

Move greener

Bicycles can be rented from the hotel reception. The trail around Jyväsjärvi lake is also nice for jogging and the map is on your room key card. We rent canoes, SUP boards and long rowing boats to our customers through our partners. In winter, ice skates and kick sleds can be rented from the harbor café.

Please contact the reception and we will help you!

Food

We always prefer local Central Finnish and Finnish food, depending on the availability. We use small bowls to reduce food waste. Please let us know if the product you want is low. When serving yourself from the buffet table, only take the amount of food you know you will eat.

Recycling

We recycle and strive to reduce waste.

We use paper products and detergents that are eco-labeled.

To participate in recycling, sort your waste by following these steps:

The in-room waste bin has separate compartments for mixed and organic waste. You can leave papers, magazines and bottles on the table.

The 2nd floor lobby has a sorting point for organic and plastic waste, metal, glass, paper, bottles and cans.

Thank you for recycling!

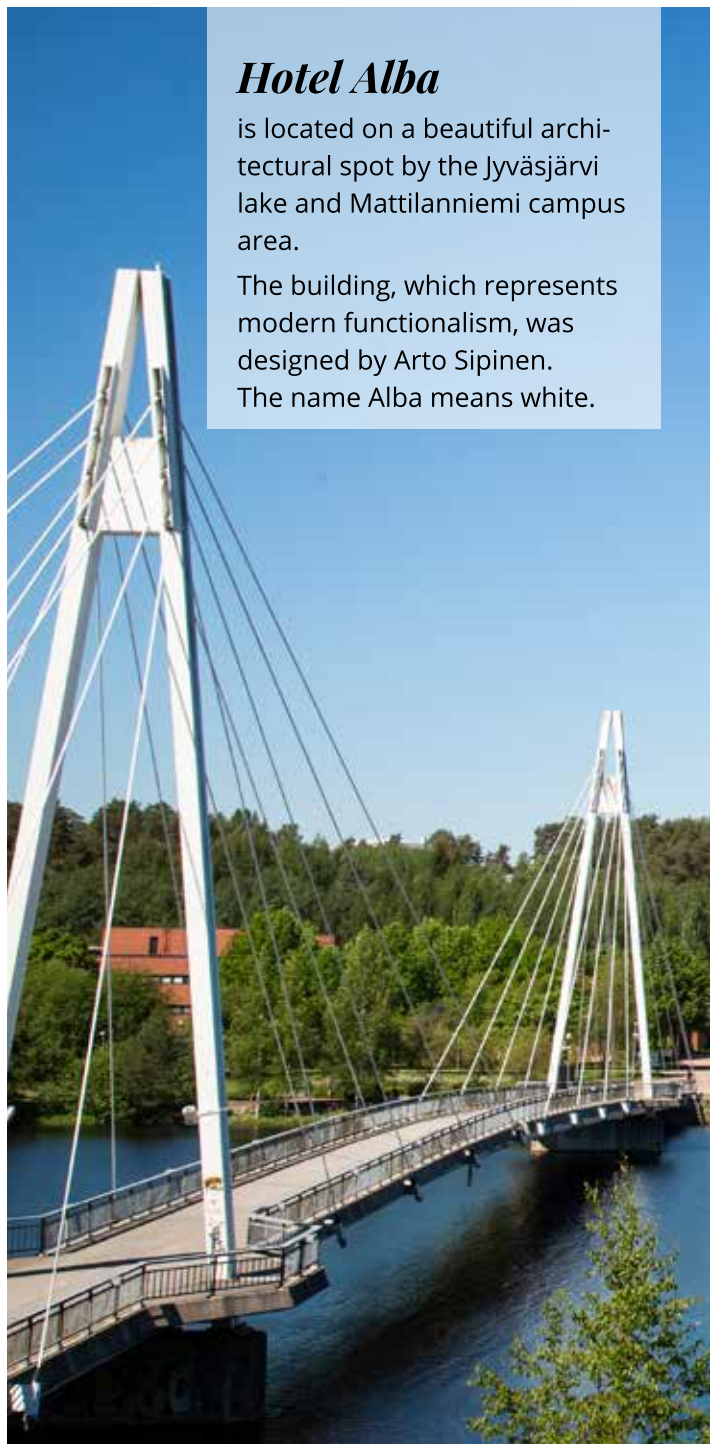

Hotel Alba's environmental policy

Hotel Alba

is located on a beautiful architectural spot by the Jyväsjärvi lake and Mattilanniemi campus area.

The building, which represents modern functionalism, was designed by Arto Sipinen. The name Alba means white.

Our environmental policy

is to promote the environmental awareness of our customers, stakeholders and staff, and to achieve the set goals through our daily operations.

The most crucial functions in hotel operations are energy consumption, waste management, water consumption and food waste.

We strive to reduce the burden on the environment by measuring and setting concrete goals.

Water

Tap water, please!

The best drinking water in the world can be found on the tap and you can drink it safely. We avoid the use of plastic bottles and recycle them if necessary.

We save water in the showers and have installed the flow to consume less than 9 liters.

Our common toilet facilities on the ground floor are equipped with NOVOSAN waterless urinals.

Energy consumption

We are buying 100% renewable electricity.

Help us reduce the energy consumption by turning off the TV and lights when you leave your room.

We save water and energy in sanitation. We change towels when you wish and sheets once a week for long-term visitors. 99% of the bulbs are energy saving or LED bulbs, please let us know if you notice anything else!
